Summary

Final-year B.Tech student in Artificial Intelligence and Machine Learning with strong foundations in software development, programming, and SDLC concepts. Skilled in Java, Python, SQL, and building scalable AI-driven applications. Experienced in developing, testing, and deploying projects across machine learning, computer vision, and recommendation systems. Passionate about solving real-world problems and building intelligent systems that create meaningful impact.

Education

Sagi Rama Krishnam Raju Engineering College *Aug 2022 - Apr 2026*
BE in Artificial Intelligence and Machine Learning

- **GPA**: 8.69/10
- **Coursework:** Artificial Intelligence, Machine Learning, Deep Learning, NLP, Computer Vision

Internships

Altair Data Science Master Virtual Internship *Jan 2026 - Present*
EduSkills (AICTE Virtual Internship Program) – Cohort 15

- Currently pursuing an industry-oriented Data Science program focused on machine learning, data engineering, and enterprise AI applications.
- Applying concepts such as data preprocessing, feature engineering, data pipelines, and model evaluation through weekly practical assessments (completed up to Week 9).
- Gaining hands-on exposure to data-driven workflows, analytics pipelines, and machine learning model development.
- Developing practical understanding of real-world AI and data science use cases using industry tools and frameworks.

AI-ML Virtual Intern (Google for Developers Program) *Oct 2025 - Dec 2025*
EduSkills Academy – Cohort 14

- Completed a 10-week AI/ML virtual internship supported by Google for Developers focusing on practical machine learning workflows.
- Built and evaluated machine learning models using Python and Scikit-learn with real-world datasets.
- Applied concepts including data preprocessing, classification, regression, and model evaluation metrics.
- Explored real-world AI applications such as predictive analytics and data-driven decision making.

Technologies

Programming Languages: Java, Python, SQL, C

Machine Learning & AI: Scikit-learn, TensorFlow, Keras, Classification, Regression, Feature Engineering, Computer Vision

Data Analysis: Pandas, NumPy, Matplotlib, Exploratory Data Analysis (EDA), Model Evaluation Metrics

Software Development: Object-Oriented Programming (OOP), Data Structures & Algorithms, REST APIs

Databases & Tools: MySQL, Firebase, Git, GitHub

Certifications

- **Machine Learning A-Z: AI, Python & R + ChatGPT Prize (Udemy)** – Covered machine learning algorithms, AI concepts, Python/R implementation, and practical projects.
- **100 Days of Code: The Complete Python Pro Bootcamp (Udemy)** – Learned Python programming from basics to advanced, building multiple real-world projects.

- **HackerRank SQL Basic Certificate** – Demonstrated proficiency in SQL queries, joins, aggregations, and data manipulation.

Projects

Machine Learning-Based Fraud Detection System

- Built a fraud detection model using supervised learning on highly imbalanced financial transaction datasets.
- Applied feature engineering and handled class imbalance using SMOTE to improve model stability.
- Evaluated models using ROC-AUC and Precision–Recall metrics to optimize fraud detection performance.
- **Technologies Used:** Python, Scikit-learn, Pandas, Matplotlib, SQL

German Traffic Sign Recognition using Deep Learning

- Developed a CNN-based deep learning model to classify German traffic signs using the GTSRB dataset with 50,000+ labeled images.
- Improved model performance through data augmentation, normalization, and hyperparameter tuning.
- Evaluated model performance using confusion matrix, precision, recall, and F1-score metrics.
- **Technologies Used:** Python, TensorFlow, Keras, OpenCV, NumPy, Matplotlib

Customer Offer Recommendation System (Collaborative Filtering)

- Developed a recommendation system using collaborative filtering to suggest personalized offers to users.
- Processed user-item interaction datasets and implemented similarity-based ranking algorithms.
- Built a modular recommendation pipeline for scalable experimentation and evaluation.
- **Technologies Used:** Python, Pandas, NumPy, Scikit-learn, Matplotlib

Achievements

- 1st Prize in 'Art Fusion' event by SRKR Event Organizing Cell (Nov 2024).
- Semifinalist in the SRKR Orator Championship, showcasing strong public speaking and communication skills.
- Organized 24-hour hackathons and major college events with SRKR Coding Club and Event Organizing Cell.
- Presented machine learning project insights to peers and mentors, improving interpretability of results.
